## PROJECTS

### AUDIOPHILE E-COMMERCE APP

- Built a responsive e-commerce platform with Next.js and Tailwind CSS, designed to reflect the premium feel of high-end audio products.
- Implemented dynamic product pages, cart functionality, and smooth navigation to deliver a modern, user-friendly shopping experience.

### A MULTI-STEP FORM APP

- Created a guided multi-step form with HTML, JavaScript, and Tailwind CSS that walks users through plan selection and form submission.
- Applied state management and validation techniques to ensure smooth navigation and error handling between steps.

### ADVICE GENERATOR APP

- Developed a lightweight advice-on-demand app using JavaScript, APIs, and Tailwind CSS to deliver random tips with a single click.
- Focused on clean UI design, smooth animations, and optimized API handling for quick responses.
